

The Ultimate Discord Casino & Automated Voice Mafia Bot

Overview

We have built a premium, high-performance Discord bot designed to massively boost server engagement, voice channel activity, and community interaction. While most economy bots offer basic text-based gambling, our bot features a fully automated, cinematic **Voice Mafia** experience and a suite of interactive, animated multiplayer casino games.

Core Value Proposition for Big Servers:

- **Drives Voice Activity:** Our flagship Mafia game forces players into Voice Channels, significantly boosting server metrics and community bonding.
- **High Retention:** Multiplayer betting lobbies and daily economy loops keep members coming back every single day.
- **Zero-Moderation Required:** The bot handles all channel creation, anti-ghosting muting, and cleanup automatically.

🔑 Key Features & Capabilities

1. The Flagship Experience: Fully Automated Voice Mafia

We completely revolutionized how Mafia (Werewolf) is played on Discord. It requires zero human moderation.

- **Interactive Host Panel:** Players type `+mafia` to open a sleek Discord UI panel to configure buy-in bets, discussion/voting timers, and special roles (👮 Guardian, 🎭 Jester).
- **Dynamic Channel Generation:** The bot instantly generates a private locked Text and Voice channel just for the game, pinging the players to join.
- **AI Voice Announcer:** The bot physically joins the VC and uses Text-to-Speech (TTS) to narrate the game phases out loud to the players!
- **Anti-Ghosting System:** When the Imposter eliminates someone, the bot instantly strips their permissions, muting them in VC and locking them out of the text chat so they cannot spoil the game.
- **Cinematic UI & Auto-Cleanup:** Features embedded GIF animations for phases/kills, and when the game concludes, the bot automatically deletes the temporary channels to keep your server clean.

2. Premium Casino & Economy System

Built on a blazing-fast PostgreSQL database, the economy system is fluid and highly addictive.

- **Multiplayer Roulette (+roulette):** Opens a public table in the chat where multiple members can place chips on Red, Black, Green, or specific numbers simultaneously before the wheel spins.
- **Coinflip (+cf):** Instant animated coinflips with embedded spinning GIFs that edit directly into the win/loss result.
- **Anti-Spam Locks:** We engineered a strict "1-Game-Per-Channel" lock. If a Roulette table is spinning, nobody can spam a Mafia lobby over it, ensuring your chat never gets flooded.

3. Multiplayer Mini-Game Lobbies

Users can host their own wager-based lobbies (`+hb`, `+hc`, `+hcr`, `+hi`) where the winner takes the pot.

- **Imposter Trivia:** A social deduction category game where one player is the imposter and must blend in.
- **Crash:** A high-stakes multiplier rocket crash game.
- **High/Low & Closest to Bot:** Multiplayer number-based betting battles.

4. Professional Architecture

- **Modern Tech Stack:** Built natively in TypeScript using Discord.js v14, backed by a Prisma ORM PostgreSQL database.
- **Zero-Lag Infrastructure:** Hosted 24/7 on Railway's enterprise cloud for instant response times and flawless voice streaming, regardless of server size.

🤝 The Collaboration Ask

We are looking to partner with massive, active communities to launch this bot. It is guaranteed to drive up your daily VC hours and give your members a highly polished, addictive game loop. We'd love to integrate this into your server and run some exclusive inaugural Mafia events for your community!
